Hassen Methnani Software Engineer | Full Stack Developer | DevOps

hassen.methnani@outlook.com +216 52 253 215 Tunis, Tunisia

PROFESSIONAL SUMMARY

Software Engineer and Full Stack Developer with hands-on experience building web applications using React, Next.js, Angular, Node.js, NestJS, Spring Boot, and TypeScript. Experienced in developing REST APIs, integrating databases such as PostgreSQL, MySQL, and MongoDB, and building maintainable full-stack solutions. Strong interest in modern web development, clean code, testing, and continuous improvement, with additional hands-on experience in Docker, CI/CD, and cloud-native technologies.

PROFESSIONAL EXPERIENCE

Junior Full-Stack Developer Intern, *Datarox* 01/2024 – 06/2024 | Résidence Le Rêve Rue du lac Huron
- Designed and developed full-stack features for a database management platform.
- Implemented an intuitive visual design module, translating complex user needs into simple and effective UI/UX.
- Developed data migration workflows supporting five enterprise database systems.
- Automated SQL generation and implemented data lineage and scheduling features ensuring reliability and traceability.
- **Technologies:** React, Node.js, Python, MongoDB.
- **DBMS:** MySQL, Oracle, SQL Server, Snowflake and PostgreSQL.

DevOps Engineer Intern, *EO Data Center* 06/2023 – 08/2023 | 15 Carthago St, Tunis 1000
- Deployed and maintained Kubernetes clusters to improve container orchestration and service reliability.
- Built Helm-based automated deployments improving developer productivity and system consistency.
- Monitored and debugged production-like systems.
- **Technologies**: Kubernetes, Docker, Helm, Prometheus, Grafana.

PERSONAL PROJECTS

DevPulse 2026
- Built a full-stack GitHub repository health analyzer using Next.js, NestJS, TypeScript, and the GitHub REST API.
- Developed an explainable engineering health scoring system analyzing documentation, testing, CI/CD, Docker, security, and project configuration.
- Implemented contributor and commit activity insights with automated backend tests using Vitest.
- Containerized the application with Docker Compose and configured GitHub Actions CI to automate testing and frontend/backend builds.

Technologies: Next.js/NestJS, GitHub API, Testing, Docker/GitHub Actions

Gusto Fusion - Web Application for Restaurant Management 2026
- Built a full-stack Restaurant Management System using Java, Spring Boot, React.js, and MySQL for orders, reservations, and staff scheduling.
- Developed REST APIs and a responsive UI, focusing on maintainability and backend performance.
- Containerized with Docker, deployed using Kubernetes and Helm, and automated CI/CD workflows with Jenkins.

Technologies: Java/Spring Boot, ReactJS, Docker, Kubernetes, Jenkins.

Business Operations Management System 2026
- Developed a microservices-based business operations system using Spring Boot and Node.js, with modular services and inter-service communication.
- Containerized services with Docker and integrated MySQL, MongoDB, and H2 to support different modules.
- Implemented and tested cross-service workflows to improve modularity and scalability.

Technologies: Java Spring Boot, Angular, MySQL, Docker

Website for Bahja Association (Freelance) 2025
- Design and development of an interactive platform to support families of children with cancer.
- Built dedicated spaces for parents and children, managed content workflows, and created a user-experience–focused interface.
- This project allowed me to work with real client constraints and significantly strengthened my professionalism and communication skills.

Technologies: Spring Boot, Angular, MySQL

EDUCATION

Computer Engineering Degree, *ESPRIT – Private Higher School of Engineering and Technology* 2019 – 2024 | Tunisie, Ariana

TECHNICAL SKILLS

Backend
Java, Spring Boot, Node.js, NestJs, Express.js, Python, REST APIs

Frontend
ReactJS/NextJS, Angular, JavaScript, TypeScript, HTML, CSS, Tailwind

Cloud & DevOps
Kubernetes, Docker, Linux, Helm, Jenkins, Prometheus, Grafana.

Databases
PostgreSQL, MySQL, MongoDB, Oracle, SQL Server, Snowflake

CERTIFICATES

Certified Kubernetes Administrator (CKA) — In Progress
Hands-on Kubernetes administration covering cluster management, networking, storage, security, troubleshooting, RBAC, Network Policies, scheduling, Helm, monitoring, and etcd backup/restore.

LANGUAGES

English
Full Professional Proficiency

French
Professional Working Proficiency

SOFT SKILLS

- Teamwork & adherence to Agile/Scrum processes
- Clear and effective communication
- Problem-solving skills
- Adaptability & fast learner
